

# Cadet Training Checklists

Cadet's Name \_\_\_\_\_

## Greetings, Cadet!

Welcome to the world of Looney Pyramids! As soon as you started to learn about pyramid gaming, you became a Space Cadet. Congrats!

Soon, you will know how to play ten or more pyramid games and thus earn the fancy title of Starship Captain!

The checklists in this little booklet will help you keep track of your progress.

We're assuming you have a copy of Pyramid Arcade, but since the rules to hundreds of these games are available online, almost any set of pyramids can be used.

## Starship Captain List

If you prefer lighter, luck-based games, you'll want to use the Zany checklist. If you like heavier, "brain-burner" games, check out games on the Brainy list, none of which involve the rolling of dice.

Since 2-player games are the most popular, we've prepared a special checklist for those games.

Lastly, there's a worksheet for you to write in the games you're the most interested in trying.

After you've learned ten games, you will need to make your list of favorites, ranked by preference, to compare with other Captains' lists when deciding what game to play next!

Use a pencil so you can make changes later
